Geolocation of Multiple Cameras

**Goal:** Develop a method to register two or more cameras/sensors into the same coordinate frame.

**Techniques:** Image Processing, Computer Vision, Laser scanner, GPS, gyroscope or whatever you can think of.

**Context:** For users of surveillance equipment, it is of utmost importance to know where objects are located.

**Siqura B.V.** is located in Gouda and provides advanced video surveillance solutions including IP cameras, video encoders, network video recorders, fiber equipment, video management and video-content analysis (VCA) software.

**Contact information:** Send your application to Anne van Vossen (a.vanvossen@tkhsecurity.com) and Julien Vijverberg (j.vijverberg@tkhsecurity.com), or visit www.siqura.com.
